// WHO WE ARE

BUILT ON DISCIPLINE. TRUSTED WITH THE MISSION.

New Tech Metals is a veteran-owned, family-owned small business dedicated to supporting the U.S. military and critical domestic industries through the supply of precision metal components and finished products to OEMs and Prime Contractors nationwide.

Supporting Defense, Transportation, and Machine & Equipment Building programs, we deliver reliable, mission-critical solutions backed by technical expertise, responsive service, and disciplined execution.

// CAPABILITIES

FABRICATION

A comprehensive range of CNC-based fabrication services. Fully automated laser cutting delivers competitive cycle times and precise, repeatable results across carbon steel, stainless steel, aluminum, and specialty alloys.

- » Laser Cutting
- » Forming
- » Welding
- » Sawing
- » PEMsertion / Rev Nuts
- » Deburring & Tumbling
- » Turret Punching
- » Shearing
- » Rolling
- » Drilling / Tapping
- » Timesaver / Graining
- » Sandblasting

KEY EQUIPMENT Fiber laser cutting systems · Stripit CNC turret punch · Marvel saw · Accurpress & Safan CNC press brakes

// CAPABILITIES

MACHINING

Prototype and advanced parts machining that complements our fabricated component capabilities. In-house expertise maintains tight quality control while minimizing cost and lead time.

A full range of CNC milling and turning equipment machines parts of varying sizes and complexities, supporting prototype, low-volume, and production quantities.

PROTOTYPE

LOW-VOLUME

PRODUCTION

KEY EQUIPMENT Haas CNC vertical machining centers · Haas EC-500 horizontal center · CNC turning with bar puller

01 · INDUSTRY · PROGRAMS WE SUPPORT

DEFENSE

Manufacturing services in support of U.S. and allied defense contractors for land and naval applications. We specialize in low to mid-volume, high-reliability components and assemblies manufactured to exacting military, aerospace, and government specifications, working directly from customer drawings and technical data packages.

PROVEN PROGRAM

Military Vehicle Component Manufacturing since 2007

COMMON APPLICATIONS

- ◆ 20+ Vehicle Platforms
- ◆ Shipboard Infrastructures
- ◆ Weapons Support Equipment
- ◆ Communications Enclosures
- ◆ Electronics Housings
- ◆ Various Structural Assemblies

ITAR COMPLIANT · DDTC REGISTERED · DFARS MATERIAL COMPLIANT

02 · INDUSTRY · PROGRAMS WE SUPPORT

TRANSPORTATION

We support a broad range of transportation industry programs with precision manufacturing. We produce vehicle bodies, structural panels, enclosures, brackets, frames, guards, housings, and subassemblies using materials selected for weight, strength, corrosion resistance, and cost. Our flexible approach supports prototype through production with repeatability, scalability, and on-time delivery.

COMMON APPLICATIONS

- ◆ Automotive
- ◆ Cargo Trailers
- ◆ Fire Apparatus
- ◆ Refuse Vehicles
- ◆ Concrete Mixers
- ◆ Various Airport Products

PROVEN PROGRAM

Cargo Trailer Weldments & Assemblies since 2000

03 · INDUSTRY · PROGRAMS WE SUPPORT

MACHINE & EQUIPMENT BUILDERS

Precision manufacturing solutions for OEMs in the machine and equipment sector. We produce high-quality components and assemblies for complex machinery, built to customer drawings and technical specifications across diverse sizes, materials, and complexities, supporting accelerated equipment launches with consistent quality and on-time delivery.

COMMON APPLICATIONS

- ◆ Paper Converting
- ◆ Packaging Equipment
- ◆ Drying & Curing Systems
- ◆ Commercial Appliance
- ◆ Power Equipment
- ◆ Material Handling

PROVEN PROGRAM

Paper Converting, Packaging & Printing Equipment Components since 2000
